DYFED STEELS LTD

Environmental Policy Statement

Dyfed Steel Ltd is fully committed to reducing our environmental impact across the scope of our operation and through the services and systems we deliver to customers.

We are fully committed to the principles of environmental sustainability through identifying and addressing the environmental aspects resulting from and associated with, our activities, products and services. In addition, embracing the Sustainable Development Goals and the promotion of the conservation of natural resources is recognised as a priority consideration for the business and for the communities in which the business operates.

The purpose of this Policy is to ensure that all relevant activities, products and services of the organisation are identified and carried out in compliance with the relevant environmental legislation and other requirements including but not limited to Prevention of Pollution.

Our aim is to reduce the environmental impact of our business activities and improve environmental efficiency through using the latest technologies and innovation. This includes but is not limited to:

- Improving energy and resource efficiency in the design, production, and deployment of its products
- Improving the environmental performance of our branches
- Enhancing the environmental efficiency of its business facilities to reduce the consumption of energy and other natural resources (e.g., electricity. water, waste).
- Comply with relevant environmental Standards and regulations as well as with in country legislative requirements.
- To act as industry/market leaders achieving organic growth through a sustainable and responsible business model.

Signed:  Managing Director Dyfed Steel.
